Md. Sai Mon Hasan Emon

AI / Software Engineer

Uttara, Dhaka | saimonemon46@gmail.com | +880 1622 015799 | LinkedIn | GitHub

PROFILE

Backend-focused AI engineer building production-ready systems with FastAPI, PHP, and Docker. Experienced in deploying ML models and developing real-world applications in live environments. Finalist at the MillionX National AI Buildathon.

WORK EXPERIENCE

Software Developer Intern ***2026***
Leotech *Dhaka, Bangladesh*

- Developing a fee management module for a live school ERP system, handling student billing, payment tracking, and record management
- Implementing backend logic in PHP and MySQL for fee calculation, transaction handling, and database operations
- Writing and optimizing SQL queries to improve data retrieval efficiency in a production environment
- Debugging and enhancing existing system features in a live deployment with real user data

EDUCATION

B.Sc. in Computer Science & Engineering ***2023 – 2027***
IUBAT – International University of Business Agriculture and Technology *Dhaka, Bangladesh*
*CGPA: **3.91 / 4.00** (Expected Graduation: 2027)*

PROJECTS

PredictWise – ML Web App — GitHub | Demo

- Built a web application serving multiple ML models (classification, regression) via a FastAPI backend.
- Integrated Scikit-learn pipelines with a front-end interface for real-time predictions on user data.
- Containerized the app with Docker, ensuring consistent behavior across development and production.

Python Auto Documentation Tool — GitHub | Demo

- Developed a CLI tool that parses Python source files using AST and generates structured Markdown docs.
- Reduced manual documentation time for a 2,000-line codebase from several hours to under two minutes.

Premium Car Rental System — GitHub | Demo

- Built a full-stack rental management system with role-based access using PHP backend and MySQL.
- Implemented booking, vehicle inventory, and user management modules with full CRUD support.
- Developed an admin dashboard for managing bookings, vehicles, users, and system activity

NexaCore Corporate Website — GitHub | Demo

- Developed a multi-page responsive corporate website with a PHP backend and MySQL database.
- Built a server-side validated contact form system with email-triggered notifications.

SKILLS

1. **Languages:** Python, PHP, C#, SQL
2. **Backend:** FastAPI, .NET MVC

3. **AI / ML:** Scikit-learn, TensorFlow, LangChain, LangGraph
4. **Databases:** MySQL, PostgreSQL
5. **Tools:** Git, Docker

CERTIFICATIONS & COURSEWORK

Applied Data Science & ML — Amar iSchool (2025)
Building NLP Projects — Amar iSchool (2025)
Prompt Engineering — Grameenphone Academy
Machine Learning & Deep Learning — CampusX

ACHIEVEMENTS

Finalist — National AI Buildathon, MillionX Bangladesh ***2026***
Ranked among top teams out of 400+ participants. Developed a health-tech AI system using LangChain and LangGraph for symptom analysis, severity prediction, report generation, and doctor recommendation.
