Md. Sai Mon Hasan Emon

Aspiring engineer

+8801622015799 saimonemon46@gmail.com Linkedin Github

Sector-10, Bamnartek New Road, Uttara, Dhaka

CAREER OBJECTIVE

Aspiring engineer with expertise in FastAPI, LangChain, LangGraph, ML/DL, agentic AI, SQL/PostgreSQL, C#, and .NET MVC. Passionate about building production-ready AI systems and full-stack applications that make an impact in real-world projects.

ACADEMIC QUALIFICATIONS

International University of Business Agriculture and Technology (IUBAT) 2027
B.Sc. in Computer Science & Engineering (BCSE)
CGPA: Expected 3.90/.00 Undergraduate

Ispahani Public School and College 2021
Higher Secondary Certificate (HSC) Comilla
GPA: 5.00

SKILLS & COMPETENCIES

Programming
Python, C/C++, C#, SQL

Generative AI
LangChain, LangGraph, LangSmith, LLM-based applications

Tools & Platforms
Git, Docker, Jupyter Notebook, VS Code

Frameworks
.NET MVC, FastAPI, Streamlit

Web Development
HTML, CSS, FastAPI, Streamlit, .NET MVC

Databases
MySQL, PostgreSQL, SQL Server

Machine Learning & AI
Scikit-learn, TensorFlow, PyTorch, Keras, Pandas, NumPy

Data Visualization
Matplotlib, Seaborn

API Development & Integration

PROJECTS

PredictWise App – Multi-Model ML Web App
- Full-stack application for user login, predictions (car & laptop prices), and history tracking, and recommended chatbot .
- Integrated multiple ML models (.pkl) with FastAPI and SQL backend.
- Admin dashboard for user management and monitoring prediction history.

PDF-QA Application (Question Answering System)
- Implemented PDF-based QA system using LangChain and LLMs.
- Integrated Groq APIs and FastAPI endpoints for efficient semantic search.

Python Code Auto-Documentation Tool

- Auto-generates Python project documentation using LangChain, Llama3, and templates.
- FastAPI endpoints with Groq API integration to enhance code readability and team collaboration.

ChatBot_LangGraph (LangChat)

- Developed a chatbot similar to ChatGPT using LangGraph with threaded conversations, message history tracking, Streamlit UI, and tools/memory access.
- Integrated FastAPI endpoints, weather API, live news API, and Tailwind for enhanced usability.

Airline Seat Management System – C#/.NET MVC

- Built a full-featured airline seat management system with C# and ASP.NET MVC.
- Features include user authentication, login/logout, profile management, seat booking, booking history, and admin dashboard.
- Integrated SQL Server database for backend storage, enabling CRUD operations for flights, seats, and users.
- Focused on clean, user-friendly UI and maintainable code structure for real-world deployment.

CERTIFICATIONS & TRAINING

- Applied Data Science & Machine Learning – Amar iSchool, 2025
- 100 Days of Deep Learning – CampusX, 2025
- Building NLP Projects – Amar iSchool, 2025
- Generative AI using LangChain – CampusX, 2025
- 100 Days of Machine Learning – CampusX, 2024
- Agentic AI using LangGraph – CampusX, 2025
