MD. SAI MON HASAN EMON

Aspiring Software Engineer | Python, FastAPI & AI Systems

Uttara, Dhaka, Bangladesh | saimonemon46@gmail.com | +880 1622 015799 | LinkedIn | GitHub | Portfolio

Computer Science undergraduate who enjoys building **backend systems and full-stack AI solutions** that hold up outside a demo. Comfortable moving between **Python/FastAPI** backends, **React** frontends, and **RAG-based AI pipelines**. Shipped an incident management platform, an AI health-triage system that reached the finals of a 400+ team national AI hackathon, and a multi-model ML prediction app — each one built and deployed end-to-end, not left as a prototype.

AREAS OF EXPERTISE

Python • JavaScript • HTML/CSS • SQL • C++ • PHP • C# • NumPy • Pandas • TensorFlow • Scikit-learn • Deep Learning • NLP • Prompt Engineering • React.js • Tailwind CSS • Django • FastAPI • REST APIs • JWT Auth • RBAC • LangChain • LangGraph • RAG • FAISS • Vector Search • PostgreSQL • MySQL • Redis • Docker • Git • GitHub • Problem Solving • Teamwork • Time Management • Learning agility

SELECTED PROJECTS

Incident Ops System

AI-powered incident management platform — FastAPI, React, PostgreSQL, Redis, Celery, Docker

- Built RBAC workflows, SLA monitoring, audit logging, notifications, and async task processing.
- Designed an AI triage layer for semantic classification, incident prioritization, and similarity matching.

Medical Triage & Doctor Recommendation System

AI healthcare platform — FastAPI, LangChain, RAG, FAISS

- Built disease prediction, doctor recommendations, symptom-based triage, and automated report generation.
- National Finalist, MillionX National AI Buildathon, among 400+ teams.

PredictWise

ML web application — FastAPI, Scikit-learn

- Multi-model prediction platform serving several trained models (.pkl) through a single REST API.

PROFESSIONAL EXPERIENCE

Software Engineer Intern — Leotech, Dhaka, Bangladesh *Jan 2026 – May 2026*

- Joined a live education management platform with real users; ramped up by reading the existing frontend and backend codebase.
- Worked on the Academic & Fee module: admission workflows, fee allocation and collection, and partial/full payments with discount logic, using PHP and MySQL.
- Paired with senior engineers on day-to-day tasks and code reviews, picking up production coding standards on the job.

EDUCATION

B.Sc. in Computer Science and Engineering *2023 – Present*

International University of Business Agriculture and Technology (IUBAT) — CGPA: 3.87/4.00

COURSES & CERTIFICATIONS

- Applied Data Science & Machine Learning — by Amar Ischool | June 2025
- Building NLP Projects — by Amar ISchool | September 2025
- Prompt Engineering — by Grameenphone Academy | October 2025
- MillionX National AI Buildathon Finalist — by MillionX Bangladesh | January 2026
- 100 Days of Machine Learning & Deep Learning — Campus X
